

Collage og udklip af mosgummi

Billedcollagen og figurene er udklippet i mosgummiplader. Både med- og uden klæb, glitter og udstansning. Enkelte dele er limet fast med Dana Super Hobbylim, hvor ikke-klæbende mosgummi er anvendt.

Inspiration: 13246

1.

Cut a piece of foam rubber with glitter to form the back section of the punched-out foam rubber frame. This frame has a self-adhesive reverse side. Attach the self-adhesive foam rubber letters and numbers onto the back.

2.

Use your imagination and cut figures, shapes and small parts from foam rubber. Attach these onto the inside of the frame (like a framed picture) using Super Hobby glue.
