

Kulørte engle af gipsgaze og bonzaitråd

Hver engel er lavet af gipsgaze, der vådt er viklet om et skelet af bonzaitråd. Efter tørring er gipsen malet med A-Color, glitter og englen er monteret med vinger af mosgummi, hår af paperyarn og en malet krone af polyler.

Inspiration: 13672

1.

Form a U-shape from piece of black bonsai wire measuring approx. 50-60cm. Push from each side where the loop is at the top to form the shape of the head.

2.

Cut some 20cm pieces of gauze bandage. Moisten the gauze bandage and wrap it piece by piece around the bonsai wire skeleton until the angel's head and body/dress come into shape. Leave the figure to dry lying down.

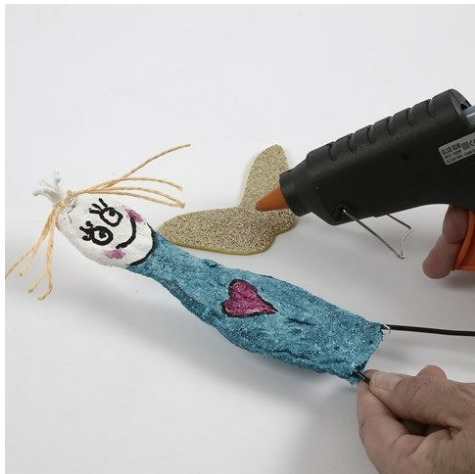

3.

Draw facial features and other details with a thick, black Uni Posca marker. Paint the dress and the small polyresin crown with A-Color glitter paint. Leave to dry.

4.

Wings: Print and cut out the template which is available as a separate PDF file for this idea. Draw the outline of the template onto glitter foam rubber and cut out.

5.

Attach the wings, the paper yarn hair and the small crown onto the gauze bandage figure.

6.

Use flat nose pliers and bend the bonsai wire to make feet, enabling the angel to stand unaided.
